## Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application☒ claims Nos. 1-3, 5-17

because:

☒ the said international application, or the said claims Nos. 15-16  
relate to the following subject matter which does not require an international preliminary examination (*specify*):

See PCT Rule 67.1.(iv): Methods for treatment of the human or animal body by surgery or therapy, as well as diagnostic methods.

☒ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. 1-3, 5-17  
are so unclear that no meaningful opinion could be formed (*specify*):

Present claims 1-3 and 5-17 relate to an extremely large number of possible compounds. Support within the meaning of Articles 6 PCT and 5 PCT is to be found, however, for only a very small proportion of the compounds. In the present case, the claims so lack support, and the application so lacks

.../...

☐ the claims, or said claims Nos. \_\_\_\_\_ are so inadequately supported by the description that no meaningful opinion could be formed.☐ no international search report has been established for said claims Nos. \_\_\_\_\_☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐

has not been furnished

☐

does not comply with the standard

the computer readable form

☐

has not been furnished

☐

does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in the Annex C-bis of the Administrative Instructions.☐ See Supplemental Box for further details.

disclosure; that a meaningful search over the whole of the claimed scope is impossible. Consequently, the opinion has been carried out for those parts of the claims which appear to be supported and disclosed, namely those parts related to the exemplified compound and closely related homologous compounds, i.e. those compounds of formula (I) wherein U=sulphur and T, W and M = carbon.

**Box No. V** Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims	<u>1-14, 17</u>	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	<u>1-14, 17</u>	NO
Industrial applicability (IA)	Claims	<u>1-14, 17</u>	YES
	Claims		NO

## 2. Citations and explanations (Rule 70.7)

The applicant's attention is drawn to the fact that the search during Chapter I was incomplete (see Box III). Thus, this opinion is only based on the search that was made.

The following documents are cited in the search report:

- D1) WO 0162713 A1
- D2) WO 0162704 A1
- D3) EP 373836 A1

D1 and D2 disclose similar phenylheteroalkylamine derivatives, which also are inhibitors of nitric oxide synthase and thereby particularly useful in the treatment of inflammatory diseases and pain.

The claimed compounds according to the present application differ from those of D1 and D2 by the presence of the heterocyclic group containing the substituents M, T, U and W instead of a phenyl group. Therefore, the invention claimed in claims 1-14 and 17 is novel.

An inventive step could not be acknowledged for the present application, since formula (I) according to claim 1 is very broad but support is only to be found in one single exemplified compound. Thus, the applicant has not shown that the technical effect is likely to exist for the whole scope of protection according to formula (I). Consequently claims 1-14 and 17 lack inventive step.

D3 relates to structurally related propanamines, which are serotonin and norepinephrine uptake inhibitors. This document only discloses the general state of the art and is not considered to be of particular relevance.

**Box No. VIII Certain observations on the international application**

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 7 and 8 are not clear and concise (see PCT Art 6), since the expression "...diseases or conditions in which inhibition of nitric oxide synthase activity is beneficial" is speculative and does not define any specific disease or condition.
